Team Losi has a revered heritage in the fuel business having produced the most popular racing fuel for a number of years prior to turning their attention exclusively to the manufacture of electric off-road cars. The new Nitrotane brand fuel has been developed by some of the most knowledgeable and successful nitro racers spanning over 4 decades. Nitrotane provides clean running and superior protection and performance. With a complete oil formulation laboratory and unmatched testing facilities at their disposal, Team Losi has the unique ability to create a specific lubrication package and maintain the highest standards in quality control. Only the absolute highest grades of methyl alcohol, genuine US made nitromethane, and hi-tech lubricants are used. Nitrotane uses both castor and synthetic oils as well as exclusive additives to provide performance and protection for all types of sport and ready to run engines. Exclusive power and anti foaming agents as well as corrosion inhibitors are used to provide stability and peak performance in extreme nitro environments. Unlike most fuels, Nitrotane comes in a UN approved steel can to prevent leakage, degradation and contamination. This means each tank of fuel will yield consistent and reliable power while burning clean and offering the highest level of protection and performance.
